Section 7.2 – Ways of Earning Part 2

Solve for the required information.

<p>If I make \$105 000 annually, how much do I make bi-weekly and semi-monthly?</p>	<p>If I make \$3700 bi-weekly, what is my salary if it were to be paid out semi-monthly?</p>
<p>I work retail and make an hourly wage of \$17.00/hr and I also get 3% commission on my sales. If I work a 6 hour shift and sell \$3000 worth of clothes, how much do I make that shift?</p>	<p>I am just starting in the real-estate game and in my first month I sell two houses. One sells for \$1.3 million the other \$750 000. I make 3% commission on the first \$150 000 of each sale and then I make 1% on the remainder of the sale price. I have to split the commission with the selling realtor and then I have to pay my Real Estate company 40% of my commission, so how much do I end up making that month?</p>
